Development Economics: Theory, Evidence & Policy

Econ 442. Prof. Robert Garlick

TUTH 10:05 AM - 11:20 AM

Codes: CI, R, SS

Prerequisites: Economics 205D and 210D

Learn about the origins of economic development and underdevelopment and the future prospects for developing countries. Study the roles of agriculture, conflict, education, industrialization, political institutions, technology, and trade. Understand the key questions facing development policy and the tools economists use to answer them. Learn from economic models, contemporary debates, large datasets, and historical case studies.
