1 Course Description

This course covers theories of the determination of national income, employment, and the price level, with policy implications. The purpose of this course is to further your understanding of the central ideas of macroeconomics. We will study long-run economic growth and short-run economic fluctuations. Once we have a basic understanding of these phenomena, we will discuss the main macroeconomic tools of the government, fiscal policy and monetary policy. By the end of the semester, you should be able to critically read articles on current economic issues that appear in publications such as The New York Times, The Wall Street Journal, and The Economist.

2 Teaching materials

We will use the textbook "Macroeconomics" by Olivier Blanchard (7th edition, Pearson; earlier editions back to the 5th are not very different and are fine, too) which is required. I plan to follow the book closely and cover the core (ch. 1-13), open economy macroeconomics (ch. 17-20) and – time permitting – additional material

about depressions and crises. If you prefer to do so, you may also use "Macroeconomics" by Abel, Bernanke, and Croushore which is similar in content and presentation. Steven Williamson's "Macroeconomics" covers basically the same topics, but the section on short-run macroeconomics is quite different.

The official course site will be on Sakai which I will use to communicate and post problem sets. Please refer to the site for updates, announcements and additional material. I will distribute an old exam for practice before the midterm and final.

Discussion sections will do exercises to practice the tools learned in class; they will not go over homeworks, though you may discuss your graded homework with the TA in his/her office hours.

3 Assessment

Class attendance is mandatory, though it is not part of your final grade. The final grade is determined by a midterm (40%) and a final (60%). A letter grade (including + and –) will be assigned to you based on your weighted average of the course score and your performance relative to the rest of the class. At my discretion, the weighting between midterm and final may change sightly, and there might be a second midterm; if so, the weighting will be adjusted. (Bi-)weekly problem sets are graded in a "Pass"/"Fail" fashion, and too many "Fail" grades will reduce your overall course grade as outlined below.

3.1 Problem Sets

I expect to give you about eight problem sets (this number might change at my discretion). You may work in groups of up to five students whose names must be listed on the problem set. Problem sets are usually posted seven days in advance and are due – unless otherwise noted – Mondays at the beginning of class. Problem sets only have a 'P' or 'F' grade. If you have three 'F's or more, one grade step will be subtracted from your course grade, an additional step for six or more 'F's! Late or missing problem sets are obviously treated as 'F.' The two "free" 'F's are for unforeseen circumstances (personal emergencies, sickness, etc.) that may cause you to miss a deadline. No exceptions are made for athletic students, job market interviews or religious holidays. Plan ahead, the problem sets will be posted at least a week before they are due!

3.2 Exams

Exams are all cumulative in that they cover the entire material covered up to the respective exam. No credit will be given for illegible handwriting and undecipherable graphs. Dates are

- Midterm: Wednesday, October 11, in class, 1:25-2:40pm
- Final: Saturday, Dec 16, 7-10pm

Students with disabilities may confidentially request appropriate academic accommodations from the Duke Disability Management System here: http://access.duke.edu/students/requesting/index.php.

3.3 Policies

No computers, tablets and cell phones in class!

Prerequisites for taking this course are enforced via DukeHub. Students that encounter problems registering should contact EcoTeach at dus_asst@econ.duke.edu, not me.

The dates of the midterm, problem sets, and final are fixed. Missed exams generally will be treated as zeroes; only serious and substantiated medical or personal emergencies may be accepted as legitimate excuses for a missed exam. Should you be sick and miss the midterm or a problem set, please follow Duke's procedures for short-term illness: http://trinity.duke.edu/undergraduate/academic-policies/illness; for longer illnesses and personal circumstances, please contact your academic dean. In that case, I will shift weight of the missed exam to the final; if you miss the final due to an excused absence, you get a make-up exam. If a religious holiday conflicts with an exam, please notify me as early as possible, but no later than two weeks before the exam; the same applies for athletes. You will then get a make-up exam.

If you think your exam or problem set should be regraded, you can request a regrade. Submit the request to me (not the TA) in writing and explain what part is graded incorrectly and why. I will then regrade the *entire exam* which may result in a lower overall score.

Duke Community Standard

"Duke University is a community dedicated to scholarship, leadership, and service and to the principles of honesty, fairness, respect, and accountability. Citizens of this community commit to reflect upon and uphold these principles in all academic and nonacademic endeavors, and to protect and promote a culture of integrity. To uphold the Duke Community Standard:

- I will not lie, cheat, or steal in my academic endeavors;
- I will conduct myself honorably in all my endeavors; and
- I will act if the Standard is compromised."

Students who violate University rules on scholastic honesty are subject to disciplinary penalties, including the possibility of failure in the course and dismissal from the University. Examples of dishonesty include but are not limited to: cheating on an exam, copying a problem set. Since dishonesty harms the individual, fellow students, and the integrity of the University, policies on scholastic dishonesty will be strictly enforced!

4 Course Schedule

The schedule below is tentative and subject to change at my discretion. Specifically, I see the material in chapters 1-13 as the core of this class, whereas chapters 18-22 are advanced topics. If we progress slower than this schedule anticipates, then I will sacrifice the later chapters in order to sufficiently cover the core. Specifically, I will keep the midterm dates fixed but adjust the material on the exams.

Date	Topic
$\mathrm{Aug}\ 28/30$	Course overview, introduction and basics (Ch. 1-2)
Sept $4/6$	Short run: Aggregate demand, goods market and financial markets (Ch. 3-4)
Sept 11/13	The short-run equilibrium: IS-LM model (Ch. 5)

Sept 18/20 IS-LM and extensions (Ch. 5/6) Sept 25/27 Labor markets (Ch. 7) Oct 2/4The medium-run equilibrium: AS-AD model (Ch. 7) and midterm review Oct 9/11Fall Break (Tu) and Midterm (Th) Oct 16/18 The medium-run equilibrium: AS-AD model (Ch. 7) and crises Oct 23/25 The Phillips Curve, inflation, NAIRU (Ch. 8-9) Oct 30/Nov 1 Growth: Facts; saving and capital accumulation (Ch. 10-11) Nov 6/8 Technical progress I (Ch. 12) Nov 13/15/20 Technical progress II (Ch. 13) Nov 22 Thanksgiving break Nov 27/29Open economy macroeconomics I (Ch. 17-18) Dec 4/6Open economy macroeconomics II (Ch. 19-20) Dec 16 Final 7-10pm

Miscellaneous

5.1 Important dates

5

- Aug 28: first day of class
- Sept 8: last day of the official add/drop period
- Oct 7-10: Fall Break
- Oct 11: Midterm (in class)
- Nov 10: last day to withdraw with W from class
- Nov 22-26: Thanksgiving Break
- Dec 16: Final, 7-10pm

5.2 Learning Resources
