2018 showed us that the word is out among Duke students: all three of the DFE study away programs were fully enrolled, with 45 sophomores taking full advantage of the programs’ guest lectures, firm visits, coursework, and cultural activities.

DFE Executive Director John Caccavale taught on all of the programs this year and ensured that every group outing, networking opportunity, and class lecture contributed to a cohesive experience for the students. The post-program evaluations reflected a deep appreciation for John's dynamic teaching style and passion for the material.

Young alumni had a special role in the Duke in New York and Duke in Chicago programs. The students were each assigned an alumni mentor as a resource for getting to know the city and learning about the college-to-career transition. We send our warm thanks to the young professionals who participated.

The DFE’s study away programs are made possible by the Duke Global Education Office, which manages every administrative aspect, from orientation to housing, and the alumni and friends who give their time year after year. The guest lecturers, site visit hosts, and mentors make the biggest impact on the students and are essential to the mission of these programs.
The DFE gives special thanks to the following organizations for engaging with the Duke in New York students this spring:
